SUMMARY

Computer Engineering Honors student at Texas A&M University seeking a software engineering internship to apply skills in Java, Python, and C++, as well as experience with Microsoft products and app development.

EDUCATION

Texas A&M University, College Station, Texas

May 2027

- Degree: Computer Engineering (Honors Program)
- GPA: 4.0 – Dean's Honor Roll

RELEVANT COURSEWORK

- *Computer Systems*: System support for programs on both single node and over network, OS interfaces, inter-process communication, system and network programming, computer security
- *Data Structures and Algorithms*: Analysis of runtime and memory usage, abstract data types and their associated algorithms including stacks, queues, sorting and selection, searching, graphs, and hashing

EXPERIENCE

Weatherford, Houston, Texas

June 2025 – August 2025

Information Technology Intern

- Created an application that displays outages and maintenance across all company locations
- App distributed to entire company, providing visibility to 10,000+ employees regarding network status
- Full-stack app development with automated real-time data delivery using Microsoft Power Platform

Austin Community College, Austin, Texas

January 2023 – May 2025

Supplemental Instruction Leader for Russian 1-4

- Helped college students learning Russian by leading study-group sessions proven to improve course completion rate by 11% and average grade by 0.5
- Assisted professor during lectures by managing up to 10 students at once in Breakout Rooms on Zoom

PROJECTS

Bulgarian Phonetic Transcription

January 2024

- Built a Java repository in GitHub (bulgarian-phonetic-transcription) that transcribes Bulgarian text into the International Phonetic Alphabet (IPA), helping non-speakers pronounce Cyrillic letters

Language App

July 2023

- Created a GUI application using Java Swing that displays the conjugations and declensions of Russian and Bulgarian words gathered through web scraping

SKILLS

- Programming and web development: Java, Python, C++, C, ARM assembly, HTML, and CSS
- Database skills: SQL and RDBMS (Relational Database Management System)
- Familiarity with Windows and Linux operating systems, as well as Git
- Microsoft Word, PowerPoint, and Excel (PivotTables, LOOKUP, SUMIF)
- Microsoft Power Platform (Power Apps, Power Automate Flows, SharePoint, Dataverse)
- Languages: Fluent in English, Bulgarian, and Russian
